What is Environment?

Our environment is our surrounding. This includes living and non-living things around us. The non-living components of environment are land and water and air. The living components are germs, plants, animals, people. All plants and animals adjust the environment in which they born and live. A change in any component of the environment may cause discomfort and affect normal life. Any unfavourable change or degeneration in the environment is known as environmental pollution. We need to protect our environment to live happily.

Threats to Environment

We live in 21st Century, all this century environment has been dirty day by day. There are different type of threat to environment such as pollution, deforestation, climate change etc. But we can prevent our environment by individuals and government activities. First of all pollution is the biggest threat to environment. we have lots of industry. Industry escape the waste water into sea or river. And that water we use to be for our daily life. That water is also used by animals and they lost their life. It is the main harmful thing to environment.

DEFORESTRATION

Deforestation can cause many environmental problems which make our lives on earth more challenging. Between 2015 and 2020, the rate of deforestation was estimated at 10 million hectares per year, down from 16 million hectares per year in 1990s.

WORLD ENVIRONMENT DAY
IS OBSERVED
ON 5th JUNE.
 EVERY YEAR

WORLD ENVIRONMENT DAY

The environment provides us with essential resources to sustain life on earth. All living things, including water, air, soil, and vegetation form the environment. However, there has been an increase in the contamination and pollution of these precious resources. Trees cut down; soil erosion occurs, water bodies, and the air filled with pollutants. It is essential to spread awareness and preserve such resources for the present and future generations. **WORLD ENVIRONMENT DAY** is one such initiative towards protecting the environment and celebrated across the world. The first world environment day was celebrated in 1974 in Spokane, USA. Our environment is one of the most important aspects to survive on this planet. It is the only thing that can make life sustainable. Without it, we cannot survive even a single day. For instance, our skin burn, our lungs will get ruptured, our blood pressure would rise. So, it is important to save our environment and nature. For this, we have to plant more and more trees.

 to destroy;
 It's everyone's
 responsibility
 to protect.

DEFORESTRATION

Deforestation can cause many environmental problems which make our lives on earth more challenging. Between 2015 and 2020, the rate of deforestation was estimated at 10 million hectares per year, down from 16 million hectares per year in 1990s.

Calling All Green Thumbs

GARDENING

If you love plants but don't really have the time to maintain them, give these indoor ones a chance. These easy-to-nurture plants can survive extreme conditions. The best part? Indoor plants will not only add some green appeal but to your home, but also purify the air and bring good luck too. Check these green goodies and go for it.

Sturdy ponytail palm

This one is also known as elephant's foot plant because the stem of the plant does look like an elephant's foot. Thanks to its thin leaves it can survive harsh conditions making it an adpt indoor plant.

Lucky Bamboo plant
A common good plant, bamboo not only brings in an aesthetic element to living quarters, but

Cool Snake plant

Also known as mother-in-law's tongue, this is one of the most beautiful decor friendly plants you can bring home. Its dark green leaves are long and stiff, and this plant can survive with minimal sun exposure in cool climate.

According to feng shui, it attracts prosperity, good health and happiness too and has a very long life.

Chinese money plant

It is a common sight in many South-east Asian homes, as people believe it brings in wealth and prosperity. That aside, it's also easy to maintain.

Let's celebrate this day by making the earth Cookies.

EARTH DAY COOKIES:

Answers - 1) Recycle 2) Deforestation 3) Reuse
4) Landfill 5) Flood 6) Protect 7) Pollution
8) Reduce 9) Reuse

GREEN SHOPPING

not pollute our delicate ecology. Here's how:

AVOID PRODUCTS WITH MICROBEADS

Many scrubs, face washes and shower gels contain microbeads (tiny non-biodegradable plastic beads less than 1mm) that pollute oceans and are ingested by marine creatures. Microbeads are made of: Polyethylene (PE), Polypropylene (PP), Polyethylene terephthalate (PET), Polymethyl methacrylate (PMMA), Nylon (PA). When you shop next, avoid items with these ingredients.

FORGET MAKE-UP WIPES

Makeup wipes are not made of only cloth; these environmentally-toxic products contain plastic fibres which are not biodegradable. So, every night when you feel too lazy to take off your makeup properly and end up using these, you essentially contribute to more toxins in the earth's soil. So, just wash your face with facewash and water.

CHOOSE CLEAR, NOT COLOURED BOTTLES

Did you know that bottles made of clear, transparent, and white plastic are easier to recycle? That's because coloured plastic bottles are difficult to recycle and require several complex processes. To avoid this, just opt for products that come in clear bottles, whenever possible.

Every day, we are acquainted with more and more events which show how much human activities has resulted in the earth being polluted with plastics and toxins. Many of these harmful elements can be found in items that we use daily or come wrapped in plastics that are not disposed off carefully. Finding small ways to make changes in our daily habits are more important than ever, as even one person's environmentally conscious behaviour can have a resounding positive impact. The trick is to simply make slightly better choices, that will
